Science

- Properties and changes of materials

Compare and group together everyday materials based on their properties, including hardness, solubility, transparency, conductivity and response to magnets. Know that some materials will dissolve in liquid to form a solution.

Use knowledge of solid, liquid and gas to decide how mixtures might be separated including through filtering, sieving and evaporation.

Demonstrate that dissolving, mixing and changes of state are reversible changes.

Explain that some changes result in the formation of new materials.

Work scientifically.
